DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Meinzer (5,012,200) (see IDS filed November 17, 2000).

Meinzer (Figs. 2a/4a) discloses a Chireix system which can be read as an outphasing system comprising: amplifiers (K1, K2) connected in parallel and shunt susceptances (S/jB) which can be read as shunt reactance and the amplitude can be modified by changing the shunt values.

Allowable Subject Matter

Claims 1-3, 5-14, 19-36 allowed.

Claims 16, 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-3 are allowed over the prior art because none of the prior art disclosed or suggested showing the particular structure and/or operation recited in these claims namely:

Claims 1, 2 call for, among others, a method of varying and adjusting outphasing system at a first range of output power values and a second range of output power values respectively.

Claims 3, 36, 5-9 call for, among others, a method of varying the power and performing outphasing according to the threshold.

Claims 10-14 call for, among others, a first method and a second method of power control according to the threshold.

Claims 16, 18 call for, among others, an RF preamplifier and an IF amplifier/RF preamplifier coupled to the outphasing system.

Claims 19-21 call for, among others, a method of performing bias control of an outphasing system.

Claims 22-35 call for, among others, a controller having the function thereof coupled to an outphasing system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
